

## SUBJECT INDEX BY ARTICLE

---

	Article
<i>Aberration of light</i>	951
<i>Acceleration of moon's mean motion</i>	748
<i>Action, equal and contrary to re-action</i>	119
<i>Activity of matter</i>	1
<i>Anomaly, mean, defined</i>	382
true, defined	382
in functions of mean anomaly	388
eccentric, defined	383
in functions of mean anomaly	386
<i>Aphelion, defined</i>	316
<i>Arbitrary constant quantities</i>	73
of elliptical motion	370, 405
<i>Arc, projected</i>	548
<i>Arcs, circular, convertible into time</i>	213
introduced by integration into series of perturbations	540, 555
<i>Areas, principle of, in a system of bodies</i>	158
in a rotating body	176
consists in	161
exists, when centre of gravity moves in space	165
in the elliptical motion of the planets	368
the first of Kepler's laws	309
<i>Areas, variation of, a test of disturbing forces</i>	180
sum of, zero on two of the co-ordinate planes and a maximum on the third	164
<i>Argument, defined</i>	394
<i>Aries, first point of</i>	359
<i>Astronomy, progress of</i>	308
<i>Astronomical tables, formation of</i>	661
correction of	662
<i>Atmosphere, density of</i>	293
height and oscillations of	302
<i>Atmospheres of planets</i>	655
<i>Attraction of spheroids</i>	354
of a planet and its satellites	354
<i>Axes of co-ordinates</i>	25
method of changing	162, 194
<i>Axes, permanent, of rotation</i>	182, 189
<i>Axis, instantaneous, of rotation</i>	194, 199
<i>Axis, major of orbits, not affected by secular variations</i>	462
periodical variations in	428, 439

*Subject Index by Article*

permanent change in	555
<i>Barometer</i> , oscillations of	306
<i>Centre of gravity</i> , of a system	135
position and properties of	137
conservation of	165
motion of, in a solid	174
motion of the same, as if the masses of the planets were united in it	352
of a planet and its satellites	352
distance of primitive impulse from	208
<i>Circular motion</i>	385
<i>Coefficients</i> of the series expressing the disturbing action of the planets	449
development of	452
numerical values of, for Jupiter	620
<i>Comets</i> , areas described by	321
<i>Continuity</i> of fluids	250, 278
<i>Co-ordinate planes</i>	25
<i>Co-ordinates</i> of a planet	406
of the moon	691
<i>Curtate distance</i> , defined	362
in functions of latitude	401
<i>Curve</i> of quickest descent	113
<i>Cycloid</i> , properties	110
<i>Day</i> , length of invariable	795
<i>Data</i> for computing the celestial motions	596
<i>Density</i>	121
of sun and planets	607
<i>Disturbing forces</i>	346
development of	445
acting on moon	677
acting on Jupiter's satellites	809
<i>Disturbed</i> rotation of a solid	198
motion of fluids	266
motion of atmosphere	302
<i>Earth</i> , the figure of	B1 <i>Fwd</i>
<i>Earth</i> , the inequalities in the motion of	642
rotation	193, 213
compression	774, 775
not homogeneous	774, 776
<i>Eccentricity</i> , defined	318
<i>Eccentricities</i> of planetary orbits	612
<i>Eclipses</i> , general theory of	925
of Jupiter's satellites	918

*Subject Index by Article*

<i>Ecliptic</i> , defined	359
obliquity of, its secular variation	648
<i>Elements</i> of the orbits of three comets	618
<i>Elements of planetary orbits</i> defined	362
enumeration of	378
determination of, from the arbitrary constant quantities of elliptical motion	374
from the initial velocity and direction of projection	407
from observation	609
variations of, whatever be the eccentricities and inclinations	422
when the eccentricities and inclinations are small	429
differential equations of the periodic variations of	439
secular variations of	441
annual and sidereal variations of	473
ditto, with regard to variable ecliptic	510
integrals of ditto	483, 498
approximate values of, in functions of the time	480
secular variations of, depending on the square of the disturbing forces	580
<i>Elliptical Orbits</i> , general overview	B2 <i>Fwd</i>
<i>Ellipticity</i> of sun, effects on the motions of the planets	592
<i>Epoch</i> , defined	362, 393
longitude of, defined	362
secular variation of	512
equation of	512
<i>Equator</i> , defined	192
<i>Equation of centre</i> , defined	382
expression of	391
of Jupiter's satellites	835
<i>Equations</i> of condition	238
<i>Equinoctial</i> points defined	359
<i>Equilibrium</i> , general principles of	39
of a particle	22, 54
of a particle on a surface	48
of a system of bodies	116, 125
of a system invariably united	132
of two bodies	124
of a solid	143
of fluids	231
of homogeneous fluids	239
of heterogeneous fluids	240
of a fluid mass in rotation	246
<i>Ethereal</i> medium, effects of, on solar system	788
<i>Falling</i> bodies, theory of	99
<i>Fixed</i> plane defined	364
<i>Fluids</i> , small undulations of	261
oscillations of, covering the earth	266

*Subject Index by Article*

<i>Force</i> , exerted by matter	2
analytical expression of	5
direction and intensity of	14
central	63
a function of the distance	39
of gravity, instantaneous transmission of	792
of gravity, varies inversely as the square of the distance	338
centrifugal	85
moving	118
living, or impetus of a system	146
conservation of	78
proportional to velocity	14
<i>Forces</i> , resolution and composition of	22
<i>Gravitation</i>	309
general overview	B2 <i>Fwd</i>
proportional to attracting mass	337
at surface of sun and planets	608
intensity of at the moon	332
intensity of on earth, determined by the length of the seconds pendulum	108
varies as the square of the sine of the latitude	107
<i>Gyration</i> , centre and radius of	210
<i>Homogeneous spheroid</i> , its compression	774
<i>Impetus</i> , definition of, true measure of labour	146
<i>Impetus</i> of a revolving solid	181
<i>Inclination</i> of an orbit defined	362
<i>Inclinations</i> of planetary orbits	613
of lunar orbit constant	728
<i>Invariable plane</i> , defined, its properties	166
in a revolving solid	204, 210
of solar system	525
<i>Isochronous curve</i>	109
<i>Jupiter</i>	651
compression of	918
<i>Jupiter and Saturn</i> , Theory of	571
computation of the perturbations of	619
great inequality of, analytical and numerical	573, 628
periodical variations in the elements of the orbits of	572
same depending on the squares of the disturbing forces	578
secular variations of, depending on the squares of the masses	580
limits and periods of the secular variations of	633
<i>Jupiter's satellites</i> , Theory of	798
relation among their mean motions and longitude	801

*Subject Index by Article*

orbits of, nearly circular	808
move nearly in the plane of the planet's equator	803
fixed planes of	803, 869
motion of nodes and apsides of, caused by the compression of primary	802
development of the disturbing forces acting on	801
perturbations in the longitudes and radii vectores of	818
equations, whence are obtained secular variations in the form of the orbits of	841
libration of	843
perturbations of, in latitude	859
equations, which give the secular variations in the positions of the orbits of	874
effects of the precession and nutation of their primary on the motions of	863
effects of the displacement of Jupiter's orbit on the motions of	868
numerical values of the perturbations of	885
determination of the masses of	889
eclipses of	919
 <i>Kepler's</i> problem of finding the true anomaly of a planet	 388
Laws	309, 323
satellites obey	324
 <i>Lagrange's</i> theorem of the variation of the elliptical elements	 417
<i>Latitude</i> defined	361
of a planet	400
perturbations of the planets in	559
of Jupiter and Saturn in	576, 577
of the moon	766
of Jupiter's satellites	878
<i>Least</i> action, principle of	78
<i>Lever</i>	130
<i>Light</i> , principle of least action, applied to the refraction of	80
velocity of	951
effects of the velocity of, on the solar system	792
<i>Longitude</i> , defined	360
mean, defined	392
true, defined	393
true, in functions of mean	392
projected, in functions of true longitude, and <i>vice versa</i>	398
true, of moon	757
true, of Jupiter's satellites	821
of the perihelion, node and epoch defined	362
<i>Longitudes</i> of the perihelia, nodes and epochs	614
<i>Lunar</i> perturbations	B3 <i>Fwd</i>
<i>Lunar</i> theory	665
equation of the tables of the sun	644

*Subject Index by Article*

<i>Magnitude</i> of the sun	350
<i>Mars</i>	649
<i>Mass</i> , definition of	120
proportional to the product of the volume and the density	122
of moon	744
<i>Masses</i> of the planets	597
<i>Mean</i> place of a planet, defined	381
motion of a planet, defined	380
motions of planets	610
motions, ratio of those of Jupiter and Saturn	571
distance of a planet, defined	384
distances of planets	611
<i>Mercury</i>	635
transits of	636
<i>Meridian</i> , defined	329
<i>Momentum</i> , defined	115
<i>Moments of inertia</i> , of a solid	176
greatest and least, belong to the principle axes of rotation	189
<i>Moon</i> , phases of	666
circular motion of	667
<i>Moon</i> , elliptical motion of	673
effects of sun's action on	676
analytical investigation of the inequalities of	687
co-ordinates of	691
secular variations in the form of the orbit of the	720
position of the orbit of the	727
mean longitude of, in functions of her true longitude	736
true longitude of, in functions of her mean longitude	757
latitude of, in functions of her true longitude	739
mean longitude	766
parallax of, in functions of her true longitude	741
mean longitude	768
constant part of equatorial parallax of	742
distance of, from the earth	744
ratios among the secular variations of	751
immense periods of secular variations of	753
apparent diameter of	746
acceleration of	748
motion of perigee of	749
nodes of	750
effects of the variation in the eccentricity of the earth's orbit on motions of	754
variation of	760
evection of	759
annual equation of	761
lesser inequalities of	763

*Subject Index by Article*

inclination of orbit of, constant	755, 786
inequalities of, from the spheroidal form of the earth	770
nutation of the orbit of, from the action of the terrestrial equator	778
inequalities of, from the action of the planets	780
effects of secular variation in the plane of the ecliptic on	786
of an ethereal medium on the motions of	788
of the resistance of light on the motions of	793
of the successive transmission of the gravitating force on the motions	794
Newtonian theory of	797
<i>Moon's</i> perigee and nodes not affected by the ether, nor by transmission of gravity	793
<i>Motion</i> , defined	1
uniform	18
variable	60
of a free particle	69
of a particle on a surface	81
of projectiles	96
<i>Motion</i> of a system of bodies	144
of centre of gravity of a system of bodies	151
of centre of gravity of a solid	174
of a system, in all possible relations between force and velocity	168
of a solid	169
rotatory	176
of fluids	248
in a conic section	317
of a system of bodies, mutually attracting each other	345
of centre of gravity of solar system	352
elliptical, of planets	359
general equations of	365
finite equations of	384
perturbed, general equations of	347
of comets	404
of sun in space	366
of a planet and satellites, the same as if they were all united in their common centre of gravity	353 352
<i>Neptune</i> , discovery of	B1 <i>Fwd</i>
<i>New planets</i>	650
<i>Nodes</i> of a planet's orbit defined	362
line of	362
<i>Normal</i>	47
<i>Numerical values</i> of the perturbations of Jupiter	619
of the motions of Jupiter's satellites	885
of the motions of the moon	735
<i>Nutation</i> of the earth's axis	193

*Subject Index by Article*

<i>Obliquity of ecliptic</i>	603
variation of	648
limited	648
<i>Observation</i> , elements of the planetary orbits determined by	596
<i>Orbits</i> of planets and comets, conic sections	309
position of, in space	397
of Jupiter and Saturn, variations of	633
determination of the motion of two, inclined at any angle	511
<i>Orbit</i> , terrestrial, secular variations of	646
<i>Parallax</i> , defined	326
horizontal defined	327
lunar	768
solar, determined from the transit of Venus	639
lunar inequalities	743
<i>Pendulum</i> , simple	103
oscillations of	109
compound	222
<i>Penumbra</i>	932
<i>Period</i> of an inequality depends on its argument	566
of great inequality of Jupiter and Saturn	571
of secular variations of the orbits of Jupiter and Saturn	633
<i>Periodic</i> time defined	319
variations in the elements of the planetary orbits	529
depend on configurations of the bodies	412
general expressions of	439
<i>Periodicity</i> of sines and cosines of circular arcs	215
<i>Perihelion</i> defined	316
<i>Perturbations of planets</i> , general overview	B2 <i>Fwd</i>
<i>Perturbations of planets</i> , theory of	410
determination of	546
by Lagrange's method	533
depending on the squares of eccentricities and inclinations	559
depending on the cubes of the same	563
arbitrary constants of	539
from the form of the sun	592
action of the satellites	594
<i>Plane</i> of greatest rotatory pressure (also called the Invariable Plane)	204
invariable, always remains parallel to itself	525
<i>Planets</i>	635
mean distances of	611
mean sidereal motions of	609
longitudes of, at epoch	888
masses of	606
densities of	507
periodic times of	610

*Subject Index by Article*

<i>Pluto</i> , discovery of	B1 <i>Fwd</i>
<i>Precession</i> of equinoxes	648
<i>Pressure</i>	43
of a particle moving on a surface	84
<i>Principle axis</i> of a solid	180
properties of	189
<i>Primitive impulse</i>	207
<i>Problem of the three bodies</i>	349
equations of	417
solution of approximate	351
<i>Projectiles</i>	96
<i>Projection</i> of lines and surfaces	131
<i>Quadratures</i> , defined	318
<i>Radius</i> of curvature defined	83
its expression	83
<i>Radius vector</i> defined	312
finite value of	314
in functions of mean anomaly	387
longitude	392
in a parabola	404
<i>Rotation</i> of the earth	B1 <i>Fwd</i>
<i>Rotation</i> of the moon	B3 <i>Fwd</i>
<i>Rotation</i> of the planets	B4 <i>Fwd</i>
<i>Rotation</i> of a solid	176
nearly about a principle axis	216
and translation independent of each other	175
of a homogeneous fluid	263
of the same when disturbed by foreign forces	266
stable and unstable	179, 180
of the earth, the measure of time	20
<i>Rotatory pressure</i> defined	129
zero in equilibrio	132
<i>Saturn</i>	652
<i>Satellites</i> , observe Kepler's laws	324
of Jupiter, Saturn, Uranus and Neptune	B4 <i>Fwd</i>
of Jupiter	B4 <i>Fwd</i>
of Jupiter, theory of	798
of Saturn	956
of Uranus	958
of Neptune	B4 <i>Fwd</i>
do not sensibly disturb their primaries with the exception of the moon	594
<i>Secular variations</i> defined	413
depend on configuration of orbit	413

*Subject Index by Article*

general expressions of	443
of elements during the period of the perturbations	566
depending on squares of disturbing forces	581
in the earth's orbit	646
<i>Sidereal</i> revolutions of planets	610
<i>Semi-diameters</i> of sun and planets	607
<i>Solar System</i> , general overview of the sun, moon, planets and satellites	B1 <i>Fwd</i>
<i>Specific</i> gravity	123
<i>Stability of solar system</i> , with regard to mean motions and greater axes	462
with regard to the forms of the orbits	488
positions of the orbits	499
whatever may be the powers of the disturbing forces	515
<i>Stars</i> , fixed, their action on solar system	659
<i>Sun</i>	656
<i>Tides</i>	268, 280
<i>Time</i> , its measure	20
convertible into degrees	213
of the oscillations of a pendulum	107
of falling through circular arcs	111
<i>Uranus</i>	653
satellites of	958
<i>Variation, secular</i> , of the plane of the ecliptic	786
of the arbitrary constant quantities determines the period and secular changes, both of translation and rotation	443
<i>Variations</i> , method of	56
<i>Velocity</i> , defined	8
variable	60
uniform	9
angular	171
in a conic section	408
<i>Virtual velocities</i> defined	51
real variations	59
<i>Venus</i>	637
transits of	637
<i>Weight</i> defined	120
<i>Year</i> , Julian	609
